ABOUT ME

Been in love with IT and technology since I was a little kid. Bachelor's degree in mathematics and computer science. Graduate Degree in automation and computer science with a graduate degree project consisting of a server-less front-end application. Fell in love with React

WORK EXPERIENCE

[29/08/2022 – Current]

React Developer

Amdaris

City: Timisoara
Country: Romania

[20/09/2021 – Current]

Frontend Developer

Endava   https://www.endava.com/

Address: Piata Consiliul Europei, No 2, United Business Center 3, Timișoara, 300088, Timisoara, Romania
City: Timisoara
Country: Romania
Name of unit or department: Development
Business or sector: Professional, scientific and technical activities
Client - OpenBet
The project provided by this client consisted in a betting platform, for both mobile and desktop devices and had a micro frontend architecture. Some of the perks and tasks working on this project were:
- working in an agile environment
- part of a scrum team
- main focus is the migration of SASS styles to JSS based on design mockups
- conversion of React components from class to functional components (when needed)
- refactoring boilerplate code into re-usable components and cleanup when needed
- create unit tests with Jest
- define and refine stories in advance for upcoming sprints, along with a business analyst
- using Ubuntu as a windows subsystem in order to develop and run their application
- using Bitbucket as a code versioning control along with Jira
- deploying end builds to several environments
- taking part in reviewing PR's of our team along with our technical leader

- took part in documenting our team's workflow, from setting up WSL on our local machines and establishing a connection with the client to how Git, Jenkins and deployments work, which helped every new comer jump right on track

[12/2019 – Current]

IT Consultant

ROREG   www.roreg.eu

Address: Strada Proclamatia de la Timisoara, Nr.5, Etaj 1, Timisoara, Romania
City: Timisoara
Country: Romania
Email address: office@roreg.eu

Business or sector: Other service activities
- Maintenance and continuous development of www.roreg.eu using Jekyll and Ruby
- Maintenance and continuous development of www.adrvest.ro using default WordPress functionalities as well as vanilla CSS, HTML, JS, jQuery
- NoSql database (Cortex Db) administration and development
- Building certain files(.xlsx, .csv) using PHP/Python scripts and Cortex API's to automate daily/weekly/monthly tasks
- Basic to medium linux administration. Shell scripts development to manipulate server-side events as well as CronJobs for the scripts mentioned above
- Web scraping and automations using Google Puppeteer/Node.Js and UiPath
- Built MacOS apps with Electron by integrating puppeteer scripts into it, providing users an easy UI/UX to use and giving them the possibility to personalise their web scraping experience
- Package managing with NPM and Yarn
- Basic Git usage (GitHub, GitLab)
- IT related HelpDesk and support
- Maintenance for devices such as PCs, laptops, phones

[01/04/2018 – 01/09/2019]

Database administrator/developer

Cortex AG   cortex-ag.com

Address: Strada Somes, Nr.17, 300570, Timisoara, Romania
City: Timisoara
Country: Romania
- use of javascript, php and own programming language (created and used only inside of Cortex Ag) for the development of scripts in order to manipulate all the incoming data, as well as already existing data
- use of javascript, html, css, bootstrap, jquery for front-end web applications
- use of nodejs for back-end scripts
- NoSql database (Cortex Db) - administration
                                           - development

[10/09/2018 – 11/02/2019]

Website Administrator

Royal Supps

Address: Baia Mare, Romania
- maintenance and continous development of www.royalsupps.com
